**DETAILED ACTION**

***Election/Restrictions***

Claim 1 is generic to the following disclosed patentably distinct species:

- Species I: Figures 1-4(a) and 7
- Species II: Figures 10-18

And sub-species:

- Sub-species I: Figure 5
- Sub-species II: Figure 6a
- Sub-species III: Figure 6b
- Sub-species IV: Figure 6c
- Sub-species V: Figure 6d

The species are independent or distinct because they disclose different arrangements of the brake system and the sub-species are independent or distinct because they show different arrangements of the shaft assembly and toothed wheel. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species and sub-species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species and sub-species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
